

DML-1200

Motorcycle Lift

Motorcycle lifting can be tricky so Dannmar Equipment developed the most user friendly, dependable and robust lift to hit the market in years. The dual hydraulic cylinders on the DML-1200 give this lift a solid 1,200 lbs capacity for lifting ATVs to V-Twins and more. The built in retractable casters make it simple to move with or without a motorcycle on the lift. If 1,200 lbs is overkill for the types of motorcycles you are working on, check out the DML-850.

FEATURES

- * Five Bar Diamond plate deck plates
- * Dual purpose side rails slide on or off with ease and are designed to be turned over and used as tool trays
- * Perfect for Motorcycles and ATVs alike
- * Built-in retractable casters
- * Can be moved when loaded
- * Automatic safety locks with seven locking positions
